

# LT600 Series

## GIS Data Collection

- Android 5.1 operating system
- GPS + GLONASS/BDS supported
- 1.5 GHz eight-core CPU
- 4G network modem
- 8-megapixel rear camera
- Support high precision stylus
- IP67 and survives 1.5 m fall onto concrete
- 9000 mAh high-performance Li-ion battery

LT600 series can work either as a GNSS controller with big display, or a tablet with enhanced accuracy for GIS data collection. It is compatible with CHC LandStar 7 software and GIS Apps on Google Play.

LT600 series can track GPS + GLONASS or GPS + BDS. It is a FAD-W positioning tablet with IP67 standard and surviving with 1.5 m fall onto concrete.

LT600 series has 9000 mAh Li-ion battery which means it can continue working more than 12 h. It will extremely enhance the efficiency of field work. Meanwhile, it uses Android 5.1 platform, so that users can save lots of time on data uploading and processing. LT600U can reach 2 m to 3 m accuracy with autonomous status; LT600T can reach 10 cm accuracy with the external antenna and under ideal environments while using NTRIP service.
